## The Northern Ontario Highways Safety Perception Survey

**TRUCK DRIVERS / FLEET OPERATORS:** You move the economy, and your voices need to be heard when decision makers consider infrastructure improvements and highway safety.

This is especially true of Hwys 11&17 in Northern Ontario. During the month of October, the Ontario Trucking Association (OTA) is asking professional truck drivers and fleets to provide their thoughts on improving road and truck safety along these highways.

The survey will only take a few minutes. The results will help inform and develop solutions that will improve highway and truck driver safety in the region. No personal, contact, or company information will be collected at any point throughout this survey.

You can take the survey in English, French or Punjabi using the following QR code:
