Sanitation and Washroom Service

The plan for the opening of Sanitation and Washroom Service (SWS) locations will consider:

- The requirement to provide service to all vulnerable persons in need of showers, washrooms or drinking water and therefore the facility will be open to the general public.
- The need to ensure physical distancing of all persons of at least 2 metres.
- The limitations of the interior physical configurations to enable physical distancing.

All sites will be operational by Friday, May 1, 2020.
